Nathan Chew, Range Logistics

nathan@rangelogistics.com

ST. LOUIS, MO., August 14, 2014 – Range Logistics has joined CargoNet[®] to bolster its ability to mitigate cargo risk for their clients. CargoNet helps prevent cargo theft and improves recovery rates through secure and controlled information sharing among theft victims, their business partners, and law enforcement officials. CargoNet uses a national database and information sharing system managed by crime analysts and subject matter experts. CargoNet is a division of Verisk Crime Analytics, a Verisk Analytics (Nasdaq:VRSK) company.

The FBI estimates the annual loss in cargo theft ranges between \$15-30 billion. To help combat this growing issue, Range Logistics will leverage CargoNet's extensive network of law enforcement agencies and shared data to further strengthen their overall cargo security plan for each client.

"Range Logistics recognizes the importance of taking a proactive approach to the growing issue of cargo theft, and we're excited to support their commitment to the cause," said Anthony Canale, Vice President of Verisk Crime Analytics.

"Cargo thieves tend to be organized and don't seem to take a day off," said Nathan Chew, President of Supply Chain Solutions at Range Logistics. He added, "It's our responsibility and commitment to our clients to have that same approach, and be a constant advocate for the safety of their cargo. We're taking a big step today in joining CargoNet, and excited about the added value for our clients."

About Range Logistics

Range Logistics (www.rangelogistics.com) is headquartered in St. Louis MO, and is a leader in third party logistics (3PL) and supply chain consultation. Each sales consultant is a certified supply chain professional (CSCP) through APICS International (www.apics.org). With over 28-years combined experience, and more than 400,000 individual shipments coordinated, Range combines experience, technology and the rigorous training of our people (RangeWay[™]). This combination allows for a low claims-to-load ratio, while at the same time maintaining a high on-time pick-up and delivery percentage.

About Verisk Crime Analytics
